

ENABLING CUSTOMER SUSTAINABILITY

Contributing to energy saving and reduction of CO₂ footprints in the construction and automotive markets

- Performance sealants for fenestration applications
- Fuel-saving additives for EV tire tread applications
- Additives for low-viscosity engine oil
- **Ricon® / Krasol® / Cleartack®**

Offering products incorporating green chemistry principals to reduce the impact of our customers' formulations

- Reducing VOC content of our portfolio
- Technologies that reduce heavy metal loadings
- Products for water-based formulations, replacing hazardous solvents
- **Ricobond®**

Participating in the circular economy with products to upgrade the properties of recycled materials

- Improving the properties of recycled material
- Increasing recycled content in thermoplastics
- **Ricon®**
